Last Updated Wednesday, 16 May 2007

This website is currently under construction and should be available in the near future.

The aim of this website will be to create an open review system for organic products and services. We hope to achieve this with community contributions both on products that we upload as well as finding new organic products for review.

Please check back on the 1st of June 2007 which is the expected launch date for OrganicPress.net
